

LIFE DRAWING

OVERVIEW

Capture the strength and character of the human form in a detail that you never thought possible our life drawing.

Life drawing is all about capturing the humanity of your model - their fragility and emotion - in a way that will captivate your audience. It's also about capturing the detail and proportion of your subject as accurately as you can.

This course will teach you precise details of human anatomy, from bone structure to muscles and skin tone. The course will also teach you the proportions and specifics that you need to bring depth to your work, as well as helping you to master perspective, light and shade.

ENTRY REQUIREMENTS

There are no formal entry requirements for this course.
